JOURNAL OF GUIDANCE, CONTROL, AND DYNAMICS
Vol. 18, No. 6, November–December 1995

1995 *Journal of Guidance, Control, and Dynamics* Index

How to Use the Index

In the Subject Index, pages 1472–1478, each technical paper is listed under a maximum of three appropriate headings. Note the number in boldface type following each paper title, and use that number to locate the paper in the Chronological Index. The Author Index, pages 1479 and 1480, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 1481–1488, lists all papers by their unique code numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based, as well as the "CP" or conference volume number if the paper was published in a bound collection of meetings papers. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 1995, that paper also will appear in both the Subject and Chronological Indexes. Authors of Comments also are listed in the Author Index.

Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aerodynamics

Design and Examination of H_∞ Robust Controller for Ground Effect Problem G95-115
Dynamic Modeling of a Trailing Wire Towed by an Orbiting Aircraft G95-132

Aeroelasticity and Aeroservoelasticity

Fundamental Mechanisms of Aeroelastic Control with Control Surface and Strain Actuation G95-001
Vibration Reduction in Rotocraft Using Active Control: A Comparison of Various Approaches G95-105
Flutter Margin Augmentation Synthesis Using Normalized Coprime Factors Approach G95-122
Unified Literal Approximations for Longitudinal Dynamics of Flexible Flight Vehicles G95-167

Aerospace Plane

Integrated Development of the Equations of Motion for Elastic Hypersonic Flight Vehicles G95-010
Approximate Altitude Transitions for High-Speed Aircraft G95-083

Communication and Air Traffic Control

Failure Diagnosis System Using ARTMAP Neural Networks G95-109

Flight Control Integration

High-Performance, Robust, Bank-To-Turn Missile Autopilot Design G95-006
Design of an Effective Controller via Disturbance Accommodating Left Eigenstructure Assignment G95-050
Integrated Flight/Propulsion Control: Subsystem Specifications for Performance G95-085
Numerical Approach to Computing Nonlinear H_∞ Control Laws G95-155
Control Stick Logic in High-Angle-of-Attack Maneuvering G95-169
Passive Airborne Navigation and Terrain Avoidance Using Gravity Gradiometry G95-227

Flight Mechanics

Dynamics and Control of a Tethered Flight Vehicle G95-009
Integrated Development of the Equations of Motion for Elastic Hypersonic Flight Vehicles G95-010
Application of Direct Transcription to Commercial Aircraft Trajectory Optimization G95-021
Optimal Aircraft Terrain-Following Analysis and Trajectory Generation G95-082
Nonlinear Decoupling Control of Aircraft Motion G95-123
Time-Optimal Lateral Maneuvers of an Aircraft G95-171

Ground Effect Machines

Design and Examination of H_∞ Robust Controller for Ground Effect Problem G95-115

Powerplant Integration

Integrated Flight/Propulsion Control: Subsystem Specifications for Performance G95-085

Rotorcraft

Identification and Simulation Evaluation of a Combat Helicopter in Hover G95-004
Rotorcraft Handling Qualities in Turbulence G95-005
Sensor Fault Detection and Diagnosis for a T700 Turboshaft Engine G95-099
Vibration Reduction in Rotocraft Using Active Control: A Comparison of Various Approaches G95-105
Flight Test of Radar Altimeter Enhancement for Terrain-Referenced Guidance G95-110

Simulation

Identification and Simulation Evaluation of a Combat Helicopter in Hover G95-004
Application of Direct Transcription to Commercial Aircraft Trajectory Optimization G95-021
Methodology for Integration of Digital Control Loaders in Aircraft Simulators G95-143

STOL/VTOL/STOVL

Integrated Flight/Propulsion Control: Subsystem Specifications for Performance G95-085

Testing, Flight and Ground

Identification of a Nonlinear Aerodynamic Model of the F-14 Aircraft G95-204

Vibration

Nonlinear Modal Control Method G95-066
Vibration Reduction in Rotocraft Using Active Control: A Comparison of Various Approaches G95-105
Application of Rigid Finite Element Method to Dynamic Analysis of Spatial Systems G95-134

Fluid Dynamics

Multiphase Flows

Fluid Force Activated Spacecraft Dynamics Driven by Gravity Gradient and Jitter Accelerations G95-184

Guidance, Control, and Dynamics Technology

Aircraft Dynamics

Identification and Simulation Evaluation of a Combat Helicopter in Hover G95-004
Integrated Development of the Equations of Motion for Elastic Hypersonic Flight Vehicles G95-010
Reduced-Order Nonlinear Analysis of Aircraft Dynamics G95-052
Solution of Aircraft Inverse Problems by Local Optimization G95-084
Nonlinear Decoupling Control of Aircraft Motion G95-123
Dynamic Modeling of a Trailing Wire Towed by an Orbiting Aircraft G95-132
Proportional Navigation and Weaving Targets G95-152
Unified Literal Approximations for Longitudinal Dynamics of Flexible Flight Vehicles G95-167
Control Stick Logic in High-Angle-of-Attack Maneuvering G95-169
Time-Optimal Lateral Maneuvers of an Aircraft G95-171

Aircraft Guidance

Star-Field Identification for Autonomous Attitude Determination G95-008
Approximate Altitude Transitions for High-Speed Aircraft G95-083
Solution of Aircraft Inverse Problems by Local Optimization G95-084
Flight Test of Radar Altimeter Enhancement for Terrain-Referenced Guidance G95-110
Aircraft Terrain Following Based on a Nonlinear Continuous Predictive Control Approach G95-124
Multistage Integration Model for Human Egomotion Perception G95-148

Aircraft Stability and Control

Robust Dynamic Inversion for Control of Highly Maneuverable Aircraft G95-002
Direct Adaptive and Neural Control of Wing-Rock Motion of Slender Delta Wings G95-003
Rotorcraft Handling Qualities in Turbulence G95-005
Dynamics and Control of a Tethered Flight Vehicle G95-009
Guaranteed Performance Control of Nonlinear Systems with Application to Flexible Space Structure G95-020
On-Line Learning Nonlinear Direct Neurocontrollers for Restructurable Control Systems G95-023
Determination of Piloting Feedback Structures for an Altitude Tracking Task G95-025
System Design by Linear Exponential Quadratic Gaussian and Loop Transfer Recovery Methodology G95-028
Reduced-Order Nonlinear Analysis of Aircraft Dynamics G95-052
Application of Restructurable Flight Control System to Large Transport Aircraft G95-053
Design with Multiple-Delay-Model and Multiple-Design-Point Approach G95-076
Robust Multirate Eigenstructure Assignment with Flight Control Application G95-080
On-Line Robust Stabilizer G95-100
Nonlinear Decoupling Control of Aircraft Motion G95-123
U-Parameter Robust Flight Control Design G95-142
Reconfigurable Tracking Control with Saturation G95-159
Nonlinear Predictive Control of Feedback Linearizable Systems and Flight Control System Design G95-160
Feedback System Design for Stable Plants with Input Saturation G95-161
Flexible Vehicle Control Using Quantitative Feedback Theory G95-165
Aircraft Flight Control in Wind Shear Using Sequential Dynamic Inversion G95-168
Minimal Time Change Detection Algorithm for Reconfigurable Flight Control Systems G95-189
Neural-Network-Based Scheme for Sensor Failure Detection, Identification, and Accommodation G95-202
Identification of a Nonlinear Aerodynamic Model of the F-14 Aircraft G95-204
Resonance Control of Aircraft Instabilities by Smooth and Continuous Feedback G95-205

Artificial Intelligence

Direct Adaptive and Neural Control of Wing-Rock Motion of Slender Delta Wings G95-003
On-Line Learning Nonlinear Direct Neurocontrollers for Restructurable Control Systems G95-023
Neural Networks Approach to AIAA Aircraft Control Design Challenge G95-114
On-Line Learning Neural-Network Controllers for Autopilot Systems G95-158
Hybrid Fuzzy Logic Flight Controller Synthesis via Pilot Modeling G95-170
Aircraft Antilock Brake System with Neural Networks and Fuzzy Logic G95-172
Expert System for Processing Uncorrelated Satellite Tracks G95-176
Neural-Network-Based Scheme for Sensor Failure Detection, Identification, and Accommodation G95-202
Recurrent Artificial Neural Network Simulation of a Chaotic System Without Training G95-230

Astrodynamics

Comment on "Optimal Cooperative Power-Limited Rendezvous Between Neighboring Circular Orbits" G93-165
Optimal Impulsive Time-Fixed Orbital Rendezvous and Interception with Path Constraints G95-007
Star-Field Identification for Autonomous Attitude Determination G95-008
Low-Thrust Orbit Transfer Guidance Using an Inverse Dynamics Approach G95-027
Autonomous Rendezvous Using Artificial Potential Function Guidance G95-035
Strong Hohmann Transfer Theorem G95-054
Transfer Orbits in Restricted Problem G95-088
Optimization of Low-Thrust Interplanetary Trajectories Using Collocation and Nonlinear Programming G95-089
Spectral Analysis of Tethered Satellite System-Mission 1 Vibrations G95-092
Matched Asymptotic Expansion Solutions for an Ablating Hypervelocity Projectile G95-101
Approximate Solution to Lawden's Problem G95-102
Optimal Atmospheric Trajectory for Aerogravity Assist with Heat Constraint G95-113
Close Conjunction Detection on Parallel Computer G95-125
Terminal Spacecraft Coplanar Rendezvous Control G95-127
Closed Loop Momentum Transfer Maneuvers Using Multiwheels G95-131
Low-Earth-Orbit Maintenance: Reboost vs Thrust–Drag Cancellation G95-146
Stability of Motion on Three-Dimensional Halo Orbits G95-173
Earth-to-Moon Transfer with a Limited Power Engine G95-175
Expert System for Processing Uncorrelated Satellite Tracks G95-176
Optimal Power-Limited Rendezvous with Thrust Saturation G95-177
Optimal Station-Change Maneuver for Geostationary Satellites Using Constant Low Thrust G95-178
Elliptical Orbit with Variable Angular Momentum G95-190
Autonomous Ring Formation for a Planar Constellation of Satellites G95-191
Aerocapture with a Flexible Tether G95-206

Avionics Systems

Flight Test of Radar Altimeter Enhancement for Terrain-Referenced Guidance G95-110

Computer Science

Impact of Near-Coincident Faults on Digital Flight Controls Systems G95-014
Impact of Near-Coincident Faults on Digital Flight Controls Systems G95-014

Control System Design

Robust Dynamic Inversion for Control of Highly Maneuverable Aircraft G95-002
Direct Adaptive and Neural Control of Wing-Rock Motion of Slender Delta Wings G95-003
High-Performance, Robust, Bank-To-Turn Missile Autopilot Design G95-006
Validation of Finite-Dimensional Approximate Solutions for Dynamics of Distributed-Parameter Systems G95-012
Piezoelectric Transformer G95-013
Guaranteed Performance Control of Nonlinear Systems with Application to Flexible Space Structure G95-020
Classical/H_2 Solution for a Robust Control Design Benchmark Problem G95-022
On-Line Learning Nonlinear Direct Neurocontrollers for Restructurable Control Systems G95-023
Dynamics and Control of Slewing Active Beam G95-026
System Design by Linear Exponential Quadratic Gaussian and Loop Transfer Recovery Methodology G95-028
Hubble Space Telescope Pointing Control System Design Improvement Study Results G95-029
Linear-Quadratic-Gaussian-Based Controller Design for Hubble Space Telescope G95-031
Analytically and Numerically Derived H_∞ Controller Designs for Hubble Space Telescope G95-032
Prescrvicing Mission, On-Orbit Modifications to Hubble Space Telescope Pointing Control System G95-033
Covariance Control Design for Hubble Space Telescope G95-034
Dynamics and Control of Limit Cycling Motions in Boosting Rockets G95-041
Control Design for Variations in Structural Natural Frequencies G95-047
Modeling and Control for Vibration Suppression of a Flexible Active Structure G95-049
Design of an Effective Controller via Disturbance Accommodating Left Eigenstructure Assignment G95-050
Application of Restructurable Flight Control System to Large Transport Aircraft G95-053
Aircraft Controller Synthesis by Solving a Nonconvex Optimization Problem G95-059
Nonlinear Modal Control Method G95-066
Trainable Neural Network for Mechanically Flexible Systems Based on Nonlinear Filtering G95-075
Design with Multiple-Delay-Model and Multiple-Design-Point Approach G95-076
Mixed H_2/H_∞ Control of Multimodel Plants G95-078
Self-Scheduled H_∞ Control of Missile via Linear Matrix Inequalities G95-079
Robust Multirate Eigenstructure Assignment with Flight Control Application G95-080
Robust Stabilization of the Space Station in the Presence of Inertia Matrix Uncertainty G95-091
Eigenstructure Assignment Using Inverse Eigenvalue Methods G95-093
New Filtering Method for Linear Weakly Coupled Stochastic Systems G95-095
Optimal Modal-Space Controller for Structural Damping Enhancements G95-104
Experimental Application of an Explicit Optimal Linear Quadratic Gaussian Controller G95-106
Neural Networks Approach to AIAA Aircraft Control Design Challenge G95-114
Decentralized Sliding Mode Control in Three-Axis Inertial Platforms G95-119
Aircraft Terrain Following Based on a Nonlinear Continuous Predictive Control Approach G95-124
Eigenvector Derivatives for Mechanical Second-Order Systems G95-135
Shaping Time Response by State Feedback in Minimum-Phase Systems G95-139
Experimental Control of a Single-Link Flexible Arm Incorporating Electrorheological Fluids G95-140
U-Parameter Robust Flight Control Design G95-142
Pointing Geometry for Low Earth Orbit Auroral Observations G95-145
Feedback Linearization Autopilot Design for the Advanced Kinetic Energy Missile Boost Phase G95-149
Numerical Approach to Computing Nonlinear H_∞ Control Laws G95-155
Closed-Form Solutions to Constrained Control Allocation Problem G95-157
On-Line Learning Neural-Network Controllers for Autopilot Systems G95-158
Reconfigurable Tracking Control with Saturation G95-159
Nonlinear Predictive Control of Feedback Linearizable Systems and Flight Control System Design G95-160
Feedback System Design for Stable Plants with Input Saturation G95-161
Dissipative Controllers for Nonlinear Multibody Flexible Space Systems G95-163
Flexible Vehicle Control Using Quantitative Feedback Theory G95-165
Aircraft Flight Control in Wind Shear Using Sequential Dynamic Inversion G95-168
Hybrid Fuzzy Logic Flight Controller Synthesis via Pilot Modeling G95-170
Aircraft Antilock Brake System with Neural Networks and Fuzzy Logic G95-172
Minimal Time Change Detection Algorithm for Reconfigurable Flight Control Systems G95-189
Optimal Tradeoff Between H_2 Performance and Tracking Accuracy in Servocompensator Synthesis G95-196
Real Structured Singular Value Synthesis Using the Scaled Popov Criterion G95-197
Resonance Control of Aircraft Instabilities by Smooth and Continuous Feedback G95-205
Comparative Stability Analysis and Performance of Magnetic Controllers for Bias Momentum Satellites G95-207
Experiments with Model-Simplified Computed-Torque Manipulator Controllers for Free-Flying Robots G95-217
Determination of Weighting Matrices of a Linear Quadratic Regulator G95-229

Control System Effectors

Neighboring Optimal Trajectories for Aeroassisted Orbital Transfer Under Uncertainties G95-072
Closed-Form Solutions to Constrained Control Allocation Problem G95-157
Control Stick Logic in High-Angle-of-Attack Maneuvering G95-169

Control System Sensors

Air Data Prediction from Surface Pressure Measurements on Guided Munitions G95-051

New Filtering Method for Linear Weakly Coupled Stochastic Systems G95-095
Sensor Fault Detection and Diagnosis for a T700 Turboshaft Engine G95-099
Minimum-Time Reorientation of a Two-Degree-of-Freedom Gyroscope G95-120
Neural-Network-Based Scheme for Sensor Failure Detection, Identification, and Accommodation G95-202
Roll/Pitch Determination with Scanning Horizon Sensors: Oblateness and Altitude Corrections G95-213

Control Theory

Robust Dynamic Inversion for Control of Highly Maneuverable Aircraft G95-002
Guaranteed Performance Control of Nonlinear Systems with Application to Flexible Space Structure G95-020
System Design by Linear Exponential Quadratic Gaussian and Loop Transfer Recovery Methodology G95-028
Covariance Control Design for Hubble Space Telescope G95-034
Attitude Stabilization of a Rigid Spaceceaft Using Two Momentum Wheel Actuators G95-038
Passivity Analysis for Flexible Multilink Space Manipulators G95-040
Dynamics and Control of Limit Cycling Motions in Boosting Rockets G95-041
Design of an Effective Controller via Disturbance Accommodating Left Eigenstructure Assignment G95-050
Nonlinear Modal Control Method G95-066
Guidance of a Homing Missile via Nonlinear Geometric Control Methods G95-067
Three-Dimensional Air-to-Air Missile Trajectory Shaping G95-068
Near-Optimal Three-Dimensional Air-to-Air Missile Guidance Against Maneuvering Target G95-069
Optimal Sliding-Mode Control of a Flexible Spacecraft Under Stochastic Disturbances G95-073
Trajectory and Control Optimization for Flexible Space Robots G95-074
Trainable Neural Network for Mechanically Flexible Systems Based on Nonlinear Filtering G95-075
Mixed H_2/H_∞ Control of Multimodel Plants G95-078
Self-Scheduled H_∞ Control of Missile via Linear Matrix Inequalities G95-079
Robust Multirate Eigenstructure Assignment with Flight Control Application G95-080
Aggregation Effects in Air Traffic Arrival Flows G95-086
Robust Stabilization of the Space Station in the Presence of Inertia Matrix Uncertainty G95-091
Eigenstructure Assignment Using Inverse Eigenvalue Methods G95-093
Decentralized Sliding Mode Control in Three-Axis Inertial Platforms G95-119
Aircraft Terrain Following Based on a Nonlinear Continuous Predictive Control Approach G95-124
Feedback Linearization Autopilot Design for the Advanced Kinetic Energy Missile Boost Phase G95-149
Optimal Pole Placement in Time-Dependent Linear Systems G95-156
Nonlinear Predictive Control of Feedback Linearizable Systems and Flight Control System Design G95-160
Feedback System Design for Stable Plants with Input Saturation G95-161
Optimal Power-Limited Rendezvous with Thrust Saturation G95-177
Distributed Control of Maneuvering Vehicles for On-Orbit Assembly G95-186
Control Variables for Finite Element Solution of Missile Trajectory Optimization G95-188
Autonomous Ring Formation for a Planar Constellation of Satellites G95-191
Optimal Tradeoff Between H_2 Performance and Tracking Accuracy in Servocompensator Synthesis G95-196
Real Structured Singular Value Synthesis Using the Scaled Popov Criterion G95-197
Resonance Control of Aircraft Instabilities by Smooth and Continuous Feedback G95-205
Comparative Stability Analysis and Performance of Magnetic Controllers for Bias Momentum Satellites G95-207
Robust Closed-Loop Control Design for Spacecraft Slew Maneuver Using Thrusters G95-210
Smooth Sliding-Mode Control for Spacecraft Attitude Tracking Maneuvers G95-211
Feedback Control Logic for Spacecraft Eigenaxis Rotations Under Slew Rate and Control Constraints G95-215
Experiments with Model-Simplified Computed-Torque Manipulator Controllers for Free-Flying Robots G95-217

Differential Games

Optimum Guidance with a Single Uncertain Time Lag G95-154

Dynamics

Validation of Finite-Dimensional Approximate Solutions for Dynamics of Distributed-Parameter Systems G95-012
Dynamics and Control of Slewing Active Beam G95-026
Covariance Control Design for Hubble Space Telescope G95-034
Alternative Variable Transformation for Simulation of Multibody Dynamic Systems G95-056
Assumed Modes Method and Articulated Flexible Multibody Dynamics G95-062
Aggregation Effects in Air Traffic Arrival Flows G95-086
Spectral Analysis of Tethered Satellite System-Mission 1 Vibrations G95-092
Hybrid Equations of Motion for Flexible Multibody Systems Using Quasicoordinates G95-107
Control of a Flexible Space Robot Executing a Docking Maneuver G95-117
Geometric Stiffening in Multibody Dynamics Formulations G95-133
Application of Rigid Finite Element Method to Dynamic Analysis of Spatial Systems G95-134
Eigenvector Derivatives for Mechanical Second-Order Systems G95-135
Calculation of Second and Higher Order Eigenvector Derivatives G95-141
Stability of Motion on Three-Dimensional Halo Orbits G95-173
Spinup Dynamics of Gyrostats G95-182
Distributed Control of Maneuvering Vehicles for On-Orbit Assembly G95-186
Resonance Capture in Unbalanced Dual-Spin Spacecraft G95-209
Feedback Control Logic for Spacecraft Eigenaxis Rotations Under Slew Rate and Control Constraints G95-215
Modeling of Translational Motion Between Two Flexible Bodies Connected via Three Points G95-218
Motion of a Rigid Body with an Attached Spring-Mass Damper G95-220
Recurrent Artificial Neural Network Simulation of a Chaotic System Without Training G95-230

Flight Displays

Multistage Integration Model for Human Egomotion Perception G95-148
Reduced-Computation End-Game Steering Laws for Predictive Guidance G95-045
System Identification for Adaptive and Reconfigurable Control G95-077
Approximate Solution to Lawden's Problem G95-102
Terminal Spacecraft Coplanar Rendezvous Control G95-127
Aircraft Flight Control in Wind Shear Using Sequential Dynamic Inversion G95-168
Nutational Stability and Passive Control of Spinning Rockets with Internal Mass Motion G95-185
Optimal Direct Ascent with Carrier Return to Base G95-187

Handling Qualities

Rotorcraft Handling Qualities in Turbulence G95-005
Determination of Piloting Feedback Structures for an Altitude Tracking Task G95-025
Flexible Vehicle Control Using Quantitative Feedback Theory G95-165

Launch Vehicle Guidance and Control

Monte Carlo Analysis of Titan/Transfer Orbit Stage Planetary Mission Guidance System G95-017
Dynamics and Control of Limit Cycling Motions in Boosting Rockets G95-041
Trajectory Optimization Using Parallel Shooting Method on Parallel Computer G95-057
Eigenvector Derivatives for Mechanical Second-Order Systems G95-135
Finite Element Method for the Solution of State-Constrained Optimal Control Problems G95-162
Optimal Direct Ascent with Carrier Return to Base G95-187
Simple Guidance Method for Single Stage to Low Earth Orbit G95-223

Missile Guidance and Control

Comment on "Analytic Solution of the Riccati Equation for the Homing Missile Linear-Quadratic Control Problem" G94-090
Reduced-Computation End-Game Steering Laws for Predictive Guidance G95-045
Optimal Guidance and Nonlinear Estimation for Interception of Decelerating Targets G95-046
Air Data Prediction from Surface Pressure Measurements on Guided Munitions G95-051
Guidance of a Homing Missile via Nonlinear Geometric Control Methods G95-067
Three-Dimensional Air-to-Air Missile Trajectory Shaping G95-068
Near-Optimal Three-Dimensional Air-to-Air Missile Guidance Against Maneuvering Target G95-069
Optimal Midcourse Guidance Law for Fixed-Interval Propulsive Maneuvers G95-070
Self-Scheduled H_∞ Control of Missile via Linear Matrix Inequalities G95-079
Radome Slope Compensation Using Multiple-Model Kalman Filters G95-098
Decentralized Sliding Mode Control in Three-Axis Inertial Platforms G95-119

Feedback Linearization Autopilot Design for the Advanced Kinetic Energy Missile Boost Phase G95-149
Bank-to-Turn Optimal Guidance with Linear Exponential Quadratic Gaussian Performance Criterion G95-150
Optimal Guidance and Nonlinear Estimation for Interception of Accelerating Targets G95-151
Proportional Navigation and Weaving Targets G95-152
Linearized Kappa Guidance G95-153
Optimum Guidance with a Single Uncertain Time Lag G95-154
Control Variables for Finite Element Solution of Missile Trajectory Optimization G95-188
Adjoint Variable Solutions via an Auxiliary Optimization Problem G95-200
Optimal Planar Interception with Terminal Constraints G95-201
Terminal Homing Performance of Semiactive Missiles Against Multitarget Raids G95-224
Bayesian State Estimation for Tracking and Guidance Using the Bootstrap Filter G95-225

Navigation

Star-Field Identification for Autonomous Attitude Determination G95-008
Study of Strapdown Navigation Attitude Algorithms G95-042
Failure Detection and Isolation Structure for Global Positioning System Autonomous Integrity Monitoring G95-043
Analytical Gain Scheduling Approach to Periodic Observer Design G95-081
Autonomous Orbit and Magnetic Field Determination Using Magnetometer and Star Sensor Data G95-087
Autonomous Imaging of Phobos and Deimos for the PLANET-B Mission G95-090
Failure Diagnosis System Using ARTMAP Neural Networks G95-109
Satellite Autonomous Navigation Based on Magnetic Field Measurements G95-128
Two Misconceptions in the Theory of Inertial Navigation Systems G95-137
Elliptical Orbit with Variable Angular Momentum G95-190
Observability of Gravimeter-Aided Inertial Navigation Systems G95-222
Terrain-Aided Navigation Using the Viterbi Algorithm G95-226
Passive Airborne Navigation and Terrain Avoidance Using Gravity Gradiometry G95-227

Optimization Techniques

Hybrid Near-Optimal Atmospheric Guidance for Aeroassisted Orbit Transfer G95-018
Application of Direct Transcription to Commercial Aircraft Trajectory Optimization G95-021
Genetic Algorithm Approach for Optimal Control Problems with Linearly Appearing Controls G95-024
Trajectory Optimization Using Parallel Shooting Method on Parallel Computer G95-057
Aircraft Controller Synthesis by Solving a Nonconvex Optimization Problem G95-059
Trajectory and Control Optimization for Flexible Space Robots G95-074
System Identification for Adaptive and Reconfigurable Control G95-077
Mixed H_2/H_∞ Control of Multimodel Plants G95-078
Optimal Aircraft Terrain-Following Analysis and Trajectory Generation G95-082
Optimization of Low-Thrust Interplanetary Trajectories Using Collocation and Nonlinear Programming G95-089
On-Line Robust Stabilizer G95-100
Optimal Guidance of Aeroassisted Transfer Vehicles Based on Matched Asymptotic Expansions G95-111
Evaluation of Optimal-Guidance Algorithm for Aeroassisted Orbit Transfer G95-112
Neural Networks Approach to AIAA Aircraft Control Design Challenge G95-114
Optimal Low-Thrust Three-Dimensional Earth–Moon Trajectories G95-126
Controllability and Optimization in Aeroassited Orbital Transfer G95-138
Shaping Time Response by State Feedback in Minimum-Phase Systems G95-139
Reconfigurable Tracking Control with Saturation G95-159
Finite Element Method for the Solution of State-Constrained Optimal Control Problems G95-162
Experimental Satellite Trajectory Analysis Using Decision-Based Robust Design G95-174
Integrating Robustness into Multiobjective Space Vehicle Design Process G95-180
Control Variables for Finite Element Solution of Missile Trajectory Optimization G95-188
Minimal Time Change Detection Algorithm for Reconfigurable Flight Control Systems G95-189
Real Structured Singular Value Synthesis Using the Scaled Popov Criterion G95-197
Adjoint Variable Solutions via an Auxiliary Optimization Problem G95-200
Simple Guidance Method for Single Stage to Low Earth Orbit G95-223

Pointing Systems

Analytically and Numerically Derived H_∞ Controller Designs for Hubble Space Telescope G95-032
Preservicing Mission, On-Orbit Modifications to Hubble Space Telescope Pointing Control System G95-033
Autonomous Imaging of Phobos and Deimos for the PLANET-B Mission G95-090
Pointing Geometry for Low Earth Orbit Auroral Observations G95-145
Near-Minimum-Time Eigenaxis Rotation Maneuvers Using Reaction Wheels G95-183

Redundancy Management

Closed-Form Solutions to Constrained Control Allocation Problem G95-157

Remote Control

Case Study on Haptic Devices: Human-Induced Instability in Powered Hand Controllers G95-015

Software Technology

Experimental Satellite Trajectory Analysis Using Decision-Based Robust Design G95-174
Integrating Robustness into Multiobjective Space Vehicle Design Process G95-180

Spacecraft Dynamics

New Formulation for General Spatial Motion of Flexible Beams G95-011
Attitude Stabilization of a Rigid Spaceceaft Using Two Momentum Wheel Actuators G95-038
General Attitude Maneuvers of Spacecraft with Flexible Structures G95-039
Study of Strapdown Navigation Attitude Algorithms G95-042
Alternative Variable Transformation for Simulation of Multibody Dynamic Systems G95-056
Assumed Modes Method and Articulated Flexible Multibody Dynamics G95-062
Instability Tests, Lyapunov's Direct Method, and Exact Stability Boundaries for Flexible Satellites G95-065
Robust Stabilization of the Space Station in the Presence of Inertia Matrix Uncertainty G95-091
Spectral Analysis of Tethered Satellite System-Mission 1 Vibrations G95-092
Vibrations of the Low Power Atmospheric Compensation Experiment Satellite G95-103
Human-in-the-Loop Evaluation of Remote Manipulator System Active Damping Augmentation G95-108
Close Conjunction Detection on Parallel Computer G95-125
Estimation and Control of Tethered Satellite Systems G95-129
Closed Loop Momentum Transfer Maneuvers Using Multiwheels G95-131
Geometric Stiffening in Multibody Dynamics Formulations G95-133
Substructure-Based Controller Design Method for Flexible Structures G95-164
Spinup Dynamics of Gyrostats G95-182
Fluid Force Activated Spacecraft Dynamics Driven by Gravity Gradient and Jitter Accelerations G95-184
Clarification of the Garber Instability for Gravity-Gradient Stabilized Spacecraft G95-193
Resonance Capture in Unbalanced Dual-Spin Spacecraft G95-209
Robust Closed-Loop Control Design for Spacecraft Slew Maneuver Using Thrusters G95-210
Feedback Control Logic for Spacecraft Eigenaxis Rotations Under Slew Rate and Control Constraints G95-215
Influence of Pinned Joints on Damping and Dynamic Behavior of a Truss G95-219
Motion of a Rigid Body with an Attached Spring-Mass Damper G95-220

Spacecraft Guidance and Control

Comment on "Optimal Cooperative Power-Limited Rendezvous Between Neighboring Circular Orbits" G93-165
Optimal Impulsive Time-Fixed Orbital Rendezvous and Interception with Path Constraints G95-007
Dynamics and Control of a Tethered Flight Vehicle G95-009
Validation of Finite-Dimensional Approximate Solutions for Dynamics of Distributed-Parameter Systems G95-012
Monte Carlo Analysis of Titan/Transfer Orbit Stage Planetary Mission Guidance System G95-017
Hybrid Near-Optimal Atmospheric Guidance for Aeroassisted Orbit Transfer G95-018
Genetic Algorithm Approach for Optimal Control Problems with Linearly Appearing Controls G95-024
Low-Thrust Orbit Transfer Guidance Using an Inverse Dynamics Approach G95-027
Linear-Quadratic-Gaussian-Based Controller Design for Hubble Space Telescope G95-031
Preservicing Mission, On-Orbit Modifications to Hubble Space Telescope Pointing Control System G95-033
Autonomous Rendezvous Using Artificial Potential Function Guidance G95-035
Attitude Control System Conceptual Design for Geostationary Operational Environmental Satellite Spacecraft Series G95-037
Attitude Stabilization of a Rigid Spaceceaft Using Two Momentum Wheel Actuators G95-038

General Attitude Maneuvers of Spacecraft with Flexible Structures G95-039
Study of Strapdown Navigation Attitude Algorithms G95-042
Robust Roll Modulation Guidance for Aeroassisted Mars Mission G95-044
Examination of a Practical Aerobraking Guidance Algorithm G95-071
Neighboring Optimal Trajectories for Aeroassisted Orbital Transfer Under Uncertainties G95-072
Optimal Sliding-Mode Control of a Flexible Spacecraft Under Stochastic Disturbances G95-073
Autonomous Orbit and Magnetic Field Determination Using Magnetometer and Star Sensor Data G95-087
Autonomous Imaging of Phobos and Deimos for the PLANET-B Mission G95-090
Approximate Solution to Lawden's Problem G95-102
Experimental Application of an Explicit Optimal Linear Quadratic Gaussian Controller G95-106
Optimal Guidance of Aeroassisted Transfer Vehicles Based on Matched Asymptotic Expansions G95-111
Evaluation of Optimal-Guidance Algorithm for Aeroassisted Orbit Transfer G95-112
Control of a Flexible Space Robot Executing a Docking Maneuver G95-117
Terminal Spacecraft Coplanar Rendezvous Control G95-127
Satellite Autonomous Navigation Based on Magnetic Field Measurements G95-128
Spacecraft Orientation Based on Space Object Observations by Means of Quaternion Algebra G95-130
Closed Loop Momentum Transfer Maneuvers Using Multiwheels G95-131
Controllability and Optimization in Aeroassited Orbital Transfer G95-138
Optimal Pole Placement in Time-Dependent Linear Systems G95-156
Dissipative Controllers for Nonlinear Multibody Flexible Space Systems G95-163
Experimental Satellite Trajectory Analysis Using Decision-Based Robust Design G95-174
Optimal Power-Limited Rendezvous with Thrust Saturation G95-177
Optimal Station-Change Maneuver for Geostationary Satellites Using Constant Low Thrust G95-178
Fuel-Optimal Stationkeeping via Differential Inclusions G95-179
Integrating Robustness into Multiobjective Space Vehicle Design Process G95-180
Near-Minimum-Time Eigenaxis Rotation Maneuvers Using Reaction Wheels G95-183
Fluid Force Activated Spacecraft Dynamics Driven by Gravity Gradient and Jitter Accelerations G95-184
Distributed Control of Maneuvering Vehicles for On-Orbit Assembly G95-186
Autonomous Ring Formation for a Planar Constellation of Satellites G95-191
Orbital Strategies Around a Comet by Means of a Genetic Algorithm G95-192
Clarification of the Garber Instability for Gravity-Gradient Stabilized Spacecraft G95-193
Comparative Stability Analysis and Performance of Magnetic Controllers for Bias Momentum Satellites G95-207
Robust Closed-Loop Control Design for Spacecraft Slew Maneuver Using Thrusters G95-210
Smooth Sliding-Mode Control for Spacecraft Attitude Tracking Maneuvers G95-211
Suboptimal Command Generation for Control Moment Gyroscopes and Feedback Control of Spacecraft G95-212
Roll/Pitch Determination with Scanning Horizon Sensors: Oblateness and Altitude Corrections G95-213
Spacecraft Attitude Determination by Kalman Filtering of Global Positioning System Signals G95-214
Experiments with Model-Simplified Computed-Torque Manipulator Controllers for Free-Flying Robots G95-217

State Estimation

Failure Detection and Isolation Structure for Global Positioning System Autonomous Integrity Monitoring G95-043
Optimal Guidance and Nonlinear Estimation for Interception of Decelerating Targets G95-046
Air Data Prediction from Surface Pressure Measurements on Guided Munitions G95-051
Maximum Likelihood Estimation of Fractional Brownian Motion and Markov Noise Parameters G95-058
Analytical Gain Scheduling Approach to Periodic Observer Design G95-081
Autonomous Orbit and Magnetic Field Determination Using Magnetometer and Star Sensor Data G95-087
New Filtering Method for Linear Weakly Coupled Stochastic Systems G95-095
Radome Slope Compensation Using Multiple-Model Kalman Filters G95-098
Identification of Linear Stochastic Systems Through Projection Filters G95-118
Satellite Autonomous Navigation Based on Magnetic Field Measurements G95-128
Estimation and Control of Tethered Satellite Systems G95-129
Bank-to-Turn Optimal Guidance with Linear Exponential Quadratic Gaussian Performance Criterion G95-150
Optimal Guidance and Nonlinear Estimation for Interception of Accelerating Targets G95-151
Bayesian State Estimation for Tracking and Guidance Using the Bootstrap Filter G95-225
Terrain-Aided Navigation Using the Viterbi Algorithm G95-226

Structural Control

Piezoelectric Transformer G95-013
Hubble Space Telescope Pointing Control System Design Improvement Study Results G95-029
Linear-Quadratic-Gaussian-Based Controller Design for Hubble Space Telescope G95-031
Analytically and Numerically Derived H_∞ Controller Designs for Hubble Space Telescope G95-032
Control Design for Variations in Structural Natural Frequencies G95-047
Optimal Sliding-Mode Control of a Flexible Spacecraft Under Stochastic Disturbances G95-073
Trajectory and Control Optimization for Flexible Space Robots G95-074
Eigenstructure Assignment Using Inverse Eigenvalue Methods G95-093
Perturbation Analysis for Flexible System Control G95-096
Regulation of Single-Link Flexible Manipulator Involving Large Elastic Deflections G95-097
Optimal Modal-Space Controller for Structural Damping Enhancements G95-104
Experimental Application of an Explicit Optimal Linear Quadratic Gaussian Controller G95-106
Hybrid Equations of Motion for Flexible Multibody Systems Using Quasicoordinates G95-107
Human-in-the-Loop Evaluation of Remote Manipulator System Active Damping Augmentation G95-108
Consistent Model Reduction of Experimental Modal Parameters for Reduced-Order Control G95-116
Control of a Flexible Space Robot Executing a Docking Maneuver G95-117
Identification of Linear Stochastic Systems Through Projection Filters G95-118
Flutter Margin Augmentation Synthesis Using Normalized Coprime Factors Approach G95-122
Experimental Control of a Single-Link Flexible Arm Incorporating Electrorheological Fluids G95-140
Generalization of the Wittrick–Williams Formula for Counting Modes of Flexible Structures G95-221

System Identification

Maximum Likelihood Estimation of Fractional Brownian Motion and Markov Noise Parameters G95-058
Efficient Computation of the Eigensystem Realization Algorithm G95-061
System Identification for Adaptive and Reconfigurable Control G95-077
Radome Slope Compensation Using Multiple-Model Kalman Filters G95-098
Sensor Fault Detection and Diagnosis for a T700 Turboshaft Engine G95-099
Optimal Modal-Space Controller for Structural Damping Enhancements G95-104
Consistent Model Reduction of Experimental Modal Parameters for Reduced-Order Control G95-116
Identification of Linear Stochastic Systems Through Projection Filters G95-118
Identification of a Nonlinear Aerodynamic Model of the F-14 Aircraft G95-204

Trajectory Optimization

Comment on "Optimal Cooperative Power-Limited Rendezvous Between Neighboring Circular Orbits" G93-165
Reply by the Authors to Yurij P. Ulybyshev G93-165
Optimal Impulsive Time-Fixed Orbital Rendezvous and Interception with Path Constraints G95-007

Chronological Index

G92-158 Robustness of Solutions to a Benchmark Control Problem. Robert F. Stengel and Christopher I. Marrison, *Princeton University* (**15**, 5, p. 1060) Article

Technical Comment by Jeremy J. Gribble, *University of Glasgow, Scotland, UK* (**18**, 6, p. 1467)

Reply (**18**, 6, p. 1468)

G93-165 Optimal Cooperative Power-Limited Rendezvous Between Neighboring Circular Orbits. Victoria Coverstone-Carroll and John E. Prussing, *University of Illinois at Urbana–Champaign* (**16**, 6, p. 1045) Article

Technical Comment by Yurij P. Ulybyshev, *NPO "Energia", Russia* (**18**, 5, p. 1223)

Reply (**18**, 5, p. 1224)

G94-090 Analytic Solution of the Riccati Equation for the Homing Missile Linear-Quadratic Control Problem. Nedeljko Lovren and Milos Tomic, *University of Sarajevo, Yugoslavia* (17, 3, p. 619) Engineering Note

Technical Comment by Ilan Rusnak, *RAFAEL, Ministry of Defense, Israel* (**18**, 4, p. 936)

G94-187 Automatic Guidance and Control for Helicopter Obstacle Avoidance. Victor H. L. Cheng, *NASA Ames Research Center*; and T. Lam, *Sterling Software* (17, 6, p. 1252) Article

Errata (**18**, 4, p. 935)

G95-001 Fundamental Mechanisms of Aeroelastic Control with Control Surface and Strain Actuation. Kenneth B. Lazarus, Edward F. Crawley, and Charrissa Y. Lin, *Massachusetts Institute of Technology* (**18**, 1, p. 10) Article

G95-002 Robust Dynamic Inversion for Control of Highly Maneuverable Aircraft. Jacob Reiner, Gary J. Balas, and William L. Garrard, *University of Minnesota* (**18**, 1, p. 18) Article

G95-003 Direct Adaptive and Neural Control of Wing-Rock Motion of Slender Delta Wings. Sahjendra N. Singh, Woosoon Yim, and William R. Wells, *University of Nevada, Las Vegas* (**18**, 1, p. 25) Article

G95-004 Identification and Simulation Evaluation of a Combat Helicopter in Hover. Jeffery A. Schroeder, *NASA Ames Research Center*; Mark B. Tischler, *U.S. Army Aeroflightdynamics Directorate*; Douglas C. Watson, *NASA Ames Research Center*; and Michelle M. Eshow, *U.S. Army Aeroflightdynamics Directorate* (**18**, 1, p. 31) Article

G95-005 Rotorcraft Handling Qualities in Turbulence. R. A. Hess, *University of California, Davis* (**18**, 1, p. 39) Article based on AIAA Paper 93-3666

G95-006 High-Performance, Robust, Bank-To-Turn Missile Autopilot Design. Ching-Fang Lin, *American GNC Corporation*; and James R. Cloutier and Johnny H. Evers, *Wright Laboratories* (**18**, 1, p. 46) Article

G95-007 Optimal Impulsive Time-Fixed Orbital Rendezvous and Interception with Path Constraints. Der-Ren Taur, *Chung Shan Institute of Science and Technology, Taiwan, ROC*; and Victoria Coverstone-Carroll and John E. Prussing, *University of Illinois at Urbana–Champaign* (**18**, 1, p. 54) Article based on AIAA Paper 90-2972

G95-008 Star-Field Identification for Autonomous Attitude Determination. M. S. Scholl, *Alenka Associates* (**18**, 1, p. 61) Article

G95-009 Dynamics and Control of a Tethered Flight Vehicle. T. S. No and J. E. Cochran Jr., *Auburn University* (**18**, 1, p. 66) Article

G95-010 Integrated Development of the Equations of Motion for Elastic Hypersonic Flight Vehicles. Karl D. Bilimoria, *Arizona State University*; and David K. Schmidt, *University of Maryland* (**18**, 1, p. 73) Article based on AIAA Paper 92-4605

G95-011 New Formulation for General Spatial Motion of Flexible Beams. W. J. Haering, *General Motors Corporation*; R. R. Ryan, *Mechanical Dynamics, Inc.*; and R. A. Scott, *University of Michigan* (**18**, 1, p. 82) Article based on AIAA Paper 93-1435

G95-012 Validation of Finite-Dimensional Approximate Solutions for Dynamics of Distributed-Parameter Systems. John L. Junkins and Sangchul Lee, *Texas A&M University* (**18**, 1, p. 87) Article

G95-013 Piezoelectric Transformer. C. Chung Won, *Lockheed Engineering and Sciences Company* (**18**, 1, p. 96) Article

G95-014 Impact of Near-Coincident Faults on Digital Flight Controls Systems. Cristian Constantinescu, *Duke University* (**18**, 1, p. 102) Article

G95-015 Case Study on Haptic Devices: Human-Induced Instability in Powered Hand Controllers. H. Kazerooni and Tanya J. Snyder, *University of California, Berkeley* (**18**, 1, p. 108) Article

G95-016 Runge-Kutta Algorithm for the Numerical Integration of Stochastic Differential Equations. N. Jeremy Kasdin, *Stanford University* (**18**, 1, p. 114) Article

G95-017 Monte Carlo Analysis of Titan/Transfer Orbit Stage Planetary Mission Guidance System. Stephen C. Bell, Marc A. Ginsburg, and Prabhakara P. Rao, *Martin Marietta Astronautics* (**18**, 1, p. 121) Article based on AIAA Paper 93-3889

G95-018 Hybrid Near-Optimal Atmospheric Guidance for Aeroassisted Orbit Transfer. Michael B. McFarland and Anthony J. Calise, *Georgia Institute of Technology* (**18**, 1, p. 128) Article based on AIAA Paper 93-3858

G95-019 Reduced-Order Model Based Control of the Flexible, Articulated-Truss Space Crane. Brian T. Bansenauer and Mark J. Balas, *University of Colorado* (**18**, 1, p. 135) Article

G95-020 Guaranteed Performance Control of Nonlinear Systems with Application to Flexible Space Structure. Y. D. Song, *North Carolina A&T State University* (**18**, 1, p. 143) Article

G95-021 Application of Direct Transcription to Commercial Aircraft Trajectory Optimization. John T. Betts and Evin J. Cramer, *Boeing Computer Services* (**18**, 1, p. 151) Article based on AIAA Paper 92-4528

G95-022 Classical/H_2 Solution for a Robust Control Design Benchmark Problem. Peter M. Thompson, *Systems Technology, Inc.* (**18**, 1, p. 160) Article

G95-023 On-Line Learning Nonlinear Direct Neurocontrollers for Restructurable Control Systems. Marcello R. Napolitano, Steve Naylor, Charles Neppach, and Van Casdorph, *West Virginia University* (**18**, 1, p. 170) Article

G95-024 Genetic Algorithm Approach for Optimal Control Problems with Linearly Appearing Controls. H. Seywald and R.

R. Kumar, *Analytical Mechanics Associates, Inc.*; and S. M. Deshpande, *Booz, Allen and Hamilton, Inc.* (**18**, 1, p. 177) Article

G95-025 Determination of Piloting Feedback Structures for an Altitude Tracking Task. Norihiro Goto, *Kyushu University, Japan* (**18**, 1, p. 183) Engineering Note based on AIAA Paper 93-3669

G95-026 Dynamics and Control of Slewing Active Beam. Moon K. Kwak, Keith K. Denoyer, and Dino Sciulli, *Phillips Laboratory* (**18**, 1, p. 185) Engineering Note

G95-027 Low-Thrust Orbit Transfer Guidance Using an Inverse Dynamics Approach. Craig A. Kluever, *University of Missouri–Columbia/Kansas City* (**18**, 1, p. 187) Engineering Note

G95-028 System Design by Linear Exponential Quadratic Gaussian and Loop Transfer Recovery Methodology. Jium-Ming Lin, *Chung-Hua Polytechnic Institute, Taiwan, ROC* (**18**, 1, p. 189) Engineering Note

G95-029 Hubble Space Telescope Pointing Control System Design Improvement Study Results. Angelia P. Bukley, *NASA Marshall Space Flight Center* (**18**, 2, p. 194) Article

G95-030 Dual-Mode Disturbance-Accommodating Pointing Controller for Hubble Space Telescope. Stewart I. Addington, *Teledyne Brown Engineering*; and C. D. Johnson, *University of Alabama in Huntsville* (**18**, 2, p. 200) Article

G95-031 Linear-Quadratic-Gaussian-Based Controller Design for Hubble Space Telescope. Emmanuel G. Collins Jr., *Florida A&M University and Florida State University*; and Stephen Richter, *Harris Corporation* (**18**, 2, p. 208) Article

G95-032 Analytically and Numerically Derived H_∞ Controller Designs for Hubble Space Telescope. R. Dennis Irwin, Russell D. Glenn, W. Garth Frazier, Douglas A. Lawrence, and Randolph F. Follett, *Mississippi State University* (**18**, 2, p. 214) Article

G95-033 Preservicing Mission, On-Orbit Modifications to Hubble Space Telescope Pointing Control System. G. S. Nurre and J. P. Sharkey, *NASA Marshall Space Flight Center*; J. D. Nelson, *Lockheed Missiles and Space Company*; and A. J. Bradley, *Allied-Signal Aerospace Company* (**18**, 2, p. 222) Article

G95-034 Covariance Control Design for Hubble Space Telescope. Guoming Zhu, Karolos M. Grigoriadis, and Robert E. Skelton, *Purdue University* (**18**, 2, p. 230) Article

G95-035 Autonomous Rendezvous Using Artificial Potential Function Guidance. Ismael Lopez and Colin R. McInnes, *University of Glasgow, Scotland, UK* (**18**, 2, p. 237) Article

G95-036 Onboard Star Identification Without A Priori Attitude Information. Eleanor A. Ketchum, *NASA Goddard Space Flight Center*; and Robert H. Tolson, *George Washington University* (**18**, 2, p. 242) Article

G95-037 Attitude Control System Conceptual Design for Geostationary Operational Environmental Satellite Spacecraft Series. F. L. Markley, F. H. Bauer, J. J. Deily, and M. D. Femiano, *NASA Goddard Space Flight Center* (**18**, 2, p. 247) Article based on AIAA Paper 91-2832 CP915

G95-038 Attitude Stabilization of a Rigid Spaceceaft Using Two Momentum Wheel Actuators. Hariharan Krishnan, *National University of Singapore*; N. Harris McClamroch, *University of Michigan*; and Mahmut Reyhanoglu, *King Fahd University of Petroleum and Minerals, Saudi Arabia* (**18**, 2, p. 256) Article

G95-039 General Attitude Maneuvers of Spacecraft with Flexible Structures. Yiing-Yuh Lin and Gern-Liang Lin, *National Cheng Kung University, Taiwan, ROC* (**18**, 2, p. 264) Article

G95-040 Passivity Analysis for Flexible Multilink Space Manipulators. Christopher J. Damaren, *Royal Roads Military College, Canada* (**18**, 2, p. 272) Article

G95-041 Dynamics and Control of Limit Cycling Motions in Boosting Rockets. Brett Newman, *Old Dominion University* (**18**, 2, p. 280) Article

G95-042 Study of Strapdown Navigation Attitude Algorithms. Howard Musoff and James H. Murphy, *Charles Stark Draper Laoratory, Inc.* (**18**, 2, p. 287) Article based on AIAA Paper 93-3891

G95-043 Failure Detection and Isolation Structure for Global Positioning System Autonomous Integrity Monitoring. Ren Da and Ching-Fang Lin, *American GNC Corporation* (**18**, 2, p. 291) Article

G95-044 Robust Roll Modulation Guidance for Aeroassisted Mars Mission. Nick A. Thorp and Bion L. Pierson, *Iowa State University* (**18**, 2, p. 298) Article

G95-045 Reduced-Computation End-Game Steering Laws for Predictive Guidance. Roger L. Barron, *Barron Associates, Inc.* (**18**, 2, p. 306) Article

G95-046 Optimal Guidance and Nonlinear Estimation for Interception of Decelerating Targets. Michael E. Hough, *Textron Defense Systems* (**18**, 2, p. 316) Article

G95-047 Control Design for Variations in Structural Natural Frequencies. Gary J. Balas, *University of Minnesota*; and Peter M. Young, *Massachusetts Institute of Technology* (**18**, 2, p. 325) Article

G95-048 Closet Bifurcation Analysis and Robust Stability Design of Flexible Satellites. Andre P. Mazzoleni, *Texas Christian University*; and Ian Dobson, *University of Wisconsin* (**18**, 2, p. 333) Article

G95-049 Modeling and Control for Vibration Suppression of a Flexible Active Structure. Jeffrey Dosch, *AVC Instrumentation*; Donald Leo, *State University of New York at Buffalo*; and Daniel Inman, *Virginia Polytechnic Institute and State University* (**18**, 2, p. 340) Article

G95-050 Design of an Effective Controller via Disturbance Accommodating Left Eigenstructure Assignment. Jae Weon Choi, Jang Gyu Lee, and Youdan Kim, *Seoul National University, Korea*; and Taesam Kang, *Hoseo University, Korea* (**18**, 2, p. 347) Article

G95-051 Air Data Prediction from Surface Pressure Measurements on Guided Munitions. M. B. Anderson, W. R. Lawrence, and J. L. Lopez, *Sverdrup Technology, Inc.* (**18**, 2, p. 355) Article

G95-052 Reduced-Order Nonlinear Analysis of Aircraft Dynamics. Gerard Leng, *National University of Singapore* (**18**, 2, p. 361) Article

G95-053 Application of Restructurable Flight Control System to Large Transport Aircraft. Y. Ochi and K. Kanai, *National Defense Academy, Japan* (**18**, 2, p. 365) Article

G95-054 Strong Hohmann Transfer Theorem. Fuyin Yuan and Koichi Matsushima, *National Aerospace Laboratory, Japan* (**18**, 2, p. 371) Engineering Note

G95-055 Uniform Modal Damping of Rings by an Extended

Node Control Theorem. Dino J. Rossetti, *North Carolina State University*; and Jian Q. Sun, *Lord Corporation* (**18**, 2, p. 373) Engineering Note

G95-056 Alternative Variable Transformation for Simulation of Multibody Dynamic Systems. Li-Farn Yang, *National Chung-Cheng University, Taiwan, ROC* (**18**, 2, p. 375) Engineering Note

G95-057 Trajectory Optimization Using Parallel Shooting Method on Parallel Computer. D. J. Wirthman, S.-Y. Park, and S. R. Vadali, *Texas A&M University* (**18**, 2, p. 377) Engineering Note

G95-058 Maximum Likelihood Estimation of Fractional Brownian Motion and Markov Noise Parameters. Michael E. Ash, *Charles Stark Draper Laboratory, Inc.*; and Matthew E. Skeen, *Cape Canaveral Air Force Station* (**18**, 2, p. 379) Engineering Note

G95-059 Aircraft Controller Synthesis by Solving a Nonconvex Optimization Problem. R. Srichander, *Technical University of Berlin, Germany* (**18**, 2, p. 382) Engineering Note

G95-060 Measurement of the Modal Parameters of a Space Structure in Zero Gravity. Edward F. Crawley, Mark S. Barlow, Marthinus C. van Schoor, and Brett Masters, *Massachusetts Institute of Technology*; and Andrew S. Bicos, *McDonnell Douglas Space System Company* (**18**, 3, p. 385) Article

G95-061 Efficient Computation of the Eigensystem Realization Algorithm. L. D. Peterson, *University of Colorado* (**18**, 3, p. 395) Article

G95-062 Assumed Modes Method and Articulated Flexible Multibody Dynamics. S. S. K. Tadikonda, T. G. Mordfin, and T. G. Hu, *Grumman Space Station Integration Division* (**18**, 3, p. 404) Article based on AIAA Paper 93-3710 CP934

G95-063 Structural Damage Detection Using Constrained Eigenstructure Assignment. Tae W. Lim, *University of Kansas* (**18**, 3, p. 411) Article

G95-064 Hybrid Approach for Damage Detection in Flexible Structures. Cuiping Li and Suzanne Weaver Smith, *University of Kentucky* (**18**, 3, p. 419) Article

G95-065 Instability Tests, Lyapunov's Direct Method, and Exact Stability Boundaries for Flexible Satellites. Andre P. Mazzoleni, *Texas Christian University*; and Ian Dobson, *University of Wisconsin* (**18**, 3, p. 426) Article

G95-066 Nonlinear Modal Control Method. Joseph C. Slater, *Wright State University*; and Daniel J. Inman, *Virginia Polytechnic Institute and State University* (**18**, 3, p. 433) Article

G95-067 Guidance of a Homing Missile via Nonlinear Geometric Control Methods. Scott Bezick, *Johns Hopkins University*; Ilan Rusnak, *RAFAEL, Ministry of Defense, Israel*; and W. Steven Gray, *Drexel University* (**18**, 3, p. 441) Article

G95-068 Three-Dimensional Air-to-Air Missile Trajectory Shaping. Renjith R. Kumar and Hans Seywald, *Analytical Mechanics Associates, Inc.*; and Eugene M. Cliff and Henry J. Kelley, *Virginia Polytechnic Institute and State University* (**18**, 3, p. 449) Article based on AIAA Paper 89-3637 CP899

G95-069 Near-Optimal Three-Dimensional Air-to-Air Missile Guidance Against Maneuvering Target. Renjith R. Kumar and Hans Seywald, *Analytical Mechanics Associates, Inc.*; and Eugene M. Cliff, *Virginia Polytechnic Institute and State University* (**18**, 3, p. 457) Article

G95-070 Optimal Midcourse Guidance Law for Fixed-Interval Propulsive Maneuvers. Mohammad-Ali Massoumnia, *Integrated Systems, Inc.* (**18**, 3, p. 465) Article

G95-071 Examination of a Practical Aerobraking Guidance Algorithm. Steven W. Evans and Greg A. Dukeman, *NASA Marshall Space Flight Center* (**18**, 3, p. 471) Article

G95-072 Neighboring Optimal Trajectories for Aeroassisted Orbital Transfer Under Uncertainties. C. D. Charalambous and D. S. Naidu, *Idaho State University*; and J. L. Hibey, *Old Dominion University* (**18**, 3, p. 478) Article based on AIAA Paper 92-0735

G95-073 Optimal Sliding-Mode Control of a Flexible Spacecraft Under Stochastic Disturbances. Alok Sinha, *Pennsylvania State University*; and David W. Miller, *Massachussets Institute of Technology* (**18**, 3, p. 486) Article

G95-074 Trajectory and Control Optimization for Flexible Space Robots. L. Meirovitch and Y. Chen, *Virginia Polytechnic Institute and State University* (**18**, 3, p. 493) Article based on AIAA Paper 93-4322 CP928

G95-075 Trainable Neural Network for Mechanically Flexible Systems Based on Nonlinear Filtering. Hsin-Tan Chiu and Sabri Cetinkunt, *University of Illinois at Chicago* (**18**, 3, p. 503) Article

G95-076 Design with Multiple-Delay-Model and Multiple-Design-Point Approach. Yoshikazu Miyazawa, *National Aerospace Laboratory, Japan* (**18**, 3, p. 508) Article based on AIAA Paper 92-4630 CP928

G95-077 System Identification for Adaptive and Reconfigurable Control. P. R. Chandler, *U.S. Air Force Wright Laboratory*; M. Pachter, *U.S. Air Force Institute of Technology*; and M. Mears, *U.S. Air Force Wright Laboratory* (**18**, 3, p. 516) Article

G95-078 Mixed H_2/H_∞ Control of Multimodel Plants. Ewald Schömig, *University of Washington*; Mario Sznaier, *Pennsylvania State University*; and Uy-Loi Ly, *University of Washington* (**18**, 3, p. 525) Article

G95-079 Self-Scheduled H_∞ Control of Missile via Linear Matrix Inequalities. Pierre Apkarian and Jean-Marc Biannic, *ONERA, France*; and Pascal Gahinet, *INRIA Rocquencourt Domaine de Voluceau* (**18**, 3, p. 532) Article

G95-080 Robust Multirate Eigenstructure Assignment with Flight Control Application. J. E. Piou, *Binghamton University*; and K. M. Sobel, *City College of New York* (**18**, 3, p. 539) Article based on AIAA Paper 94-3542

G95-081 Analytical Gain Scheduling Approach to Periodic Observer Design. Jeff Wesley Fisher, *Lockheed Missiles and Space Company*; and Arthur Earl Bryson Jr., *Stanford University* (**18**, 3, p. 547) Article

G95-082 Optimal Aircraft Terrain-Following Analysis and Trajectory Generation. Ping Lu and Bion L. Pierson, *Iowa State University* (**18**, 3, p. 555) Article

G95-083 Approximate Altitude Transitions for High-Speed Aircraft. M. D. Ardema, *Santa Clara University*; J. V. Bowles and E. J. Terjesen, *NASA Ames Research Center*; and T. Whittaker, *Sterling Software* (**18**, 3, p. 561) Article

G95-084 Solution of Aircraft Inverse Problems by Local Optimization. Guido de Matteis, Luciano M. de Socio, and Alexander Leonessa, *University of Rome "La Sapienza", Italy* (**18**, 3, p. 567) Article

G95-085 Integrated Flight/Propulsion Control: Subsystem

Specifications for Performance. W. Kenneth Neighbors III and Stephen M. Rock, *Stanford University* (**18**, 3, p. 572) Article

G95-086 Aggregation Effects in Air Traffic Arrival Flows. James DeArmon, *The MITRE Corporation* (**18**, 3, p. 579) Article

G95-087 Autonomous Orbit and Magnetic Field Determination Using Magnetometer and Star Sensor Data. Mark L. Psiaki, *Cornell University* (**18**, 3, p. 584) Article based on AIAA Paper 93-3825

G95-088 Transfer Orbits in Restricted Problem. Antonio Fernando Bertachini de Almeida Prado, *Instituto Naçional de Pesquisas Espaciasis, Brazil*; and Roger Broucke, *University of Texas at Austin* (**18**, 3, p. 593) Article based on AIAA Paper 94-3745

G95-089 Optimization of Low-Thrust Interplanetary Trajectories Using Collocation and Nonlinear Programming. Sean Tang and Bruce A. Conway, *University of Illinois at Urbana–Champaign* (**18**, 3, p. 599) Article

G95-090 Autonomous Imaging of Phobos and Deimos for the PLANET-B Mission. Jun'ichiro Kawaguchi, Tatsuaki Hashimoto, Ichiro Nakatani, and Keiken Ninomiya, *Institute of Space and Astronautical Science, Japan* (**18**, 3, p. 605) Article

G95-091 Robust Stabilization of the Space Station in the Presence of Inertia Matrix Uncertainty. Bong Wie and Qiang Liu, *Arizona State University*; and John Sunkel, *NASA Johnson Space Flight Center* (**18**, 3, p. 611) Article

G95-092 Spectral Analysis of Tethered Satellite System-Mission 1 Vibrations. S. Bergamaschi, F. Bonon, and M. Legnami, *University of Padova, Italy* (**18**, 3, p. 618) Article

G95-093 Eigenstructure Assignment Using Inverse Eigenvalue Methods. D. J. Inman and A. Kress, *Virginia Polytechnic Institute and State University* (**18**, 3, p. 625) Engineering Note

G95-094 Variance-Based Sensor Placement for Modal Identification of Structures. Frederick A. Tasker and Chinchao Liu, *University of Maryland Baltimore County* (**18**, 3, p. 627) Engineering Note

G95-095 New Filtering Method for Linear Weakly Coupled Stochastic Systems. Z. Gajic and Z. Aganovic, *Rutgers University* (**18**, 3, p. 630) Engineering Note

G95-096 Perturbation Analysis for Flexible System Control. Chun-Liang Lin, *Feng Chia University, Taiwan, ROC* (**18**, 3, p. 633) Engineering Note

G95-097 Regulation of Single-Link Flexible Manipulator Involving Large Elastic Deflections. King Yuan, *National Taiwan University, Taiwan, ROC* (**18**, 3, p. 635) Engineering Note

G95-098 Radome Slope Compensation Using Multiple-Model Kalman Filters. Jium-Ming Lin, *Chung-Hua Polytechnic Institute, Taiwan, ROC*; and Yuan-Fong Chau, *Chung-Shan Institute of Science and Technology, Taiwan, ROC* (**18**, 3, p. 637) Engineering Note

G95-099 Sensor Fault Detection and Diagnosis for a T700 Turboshaft Engine. Jonathan Litt, *NASA Lewis Research Center*; Mehmet Kurtkaya, *Oyak Renault Automobile Company, Turkey*; and Ahmet Duyar, *Florida Atlantic University* (**18**, 3, p. 640) Engineering Note

G95-100 On-Line Robust Stabilizer. R. Balan and D. Aur, *University "Politehnica" of Bucharest, Romania* (**18**, 3, p. 642) Engineering Note

G95-101 Matched Asymptotic Expansion Solutions for an Ablating Hypervelocity Projectile. Colin R. McInnes, *University of Glasgow, Scotland, UK* (**18**, 3, p. 644) Engineering Note

G95-102 Approximate Solution to Lawden's Problem. Jerome M. Baker, *The Analytical Sciences Corporation* (**18**, 3, p. 646) Engineering Note

G95-103 Vibrations of the Low Power Atmospheric Compensation Experiment Satellite. Shalom Fisher, *U.S. Naval Research Laboratory*; Kenneth I. Schultz, *Massachusetts Institute of Technology, Lincoln Laboratory*; and Lawrence W. Taylor Jr., *NASA Langley Research Center* (**18**, 4, p. 650) Article

G95-104 Optimal Modal-Space Controller for Structural Damping Enhancements. Min-Hung Hsiao, *Taipei Institute of Technology, Taiwan, ROC*; Jen-Kuang Huang, *Old Dominion University*; and Lawrence W. Taylor Jr., *NASA Langley Research Center* (**18**, 4, p. 657) Article

G95-105 Vibration Reduction in Rotocraft Using Active Control: A Comparison of Various Approaches. Peretz P. Friedmann and Thomas A. Millott, *University of California, Los Angeles* (**18**, 4, p. 664) Article

G95-106 Experimental Application of an Explicit Optimal Linear Quadratic Gaussian Controller. John H. Lilly, *University of Louisville* (**18**, 4, p. 674) Article

G95-107 Hybrid Equations of Motion for Flexible Multibody Systems Using Quasicoordinates. L. Meirovitch and T. Stemple, *Virginia Polytechnic Institute and State University* (**18**, 4, p. 678) Article

G95-108 Human-in-the-Loop Evaluation of Remote Manipulator System Active Damping Augmentation. Martha E. Demeo, *ViGYAN, Inc.*; Michael G. Gilbert and Michael A. Scott, *NASA Langley Research Center*; Janet A. Lepanto, *Charles Stark Draper Laboratory, Inc.*; Elizabeth M. Bains, *NASA Johnson Space Center*; and Mary C. Jensen, *Lockheed Engineering and Sciences Company, Inc.* (**18**, 4, p. 689) Article based on AIAA Paper 93-3875 CP934

G95-109 Failure Diagnosis System Using ARTMAP Neural Networks. Ren Da and Ching-Fang Lin, *American GNC Corporation* (**18**, 4, p. 696) Article

G95-110 Flight Test of Radar Altimeter Enhancement for Terrain-Referenced Guidance. Richard E. Zelenka, *NASA Ames Research Center*; Zee Yee, *U.S. Army Command/Control and Systems Integration Directorate*; and Andre Zirkler, *Vitronics, Inc.* (**18**, 4, p. 702) Article
Errata (**18**, 6, p. 1470)

G95-111 Optimal Guidance of Aeroassisted Transfer Vehicles Based on Matched Asymptotic Expansions. A. J. Calise and N. Melamed, *Georgia Institute of Technology* (**18**, 4, p. 709) Article based on AIAA Paper 91-2680 CP915

G95-112 Evaluation of Optimal-Guidance Algorithm for Aeroassisted Orbit Transfer. N. Melamed and A. J. Calise, *Georgia Institute of Technology* (**18**, 4, p. 718) Article based on AIAA Paper 92-4454 CP928

G95-113 Optimal Atmospheric Trajectory for Aerogravity Assist with Heat Constraint. Fayyaz A. Lohar, Arun K. Misra, and Dan Mateescu, *McGill University, Canada* (**18**, 4, p. 723) Article

G95-114 Neural Networks Approach to AIAA Aircraft Control Design Challenge. C. M. Ha, *Lockheed Fort Worth Company* (**18**, 4, p. 731) Article

G95-115 Design and Examination of H_∞ Robust Controller for Ground Effect Problem. Kyoko Nitta, *Nagoya University, Japan* (**18**, 4, p. 740) Article

G95-116 Consistent Model Reduction of Experimental Modal Parameters for Reduced-Order Control. K. F. Alvin, L. D. Peterson, and K. C. Park, *University of Colorado* (**18**, 4, p. 748) Article

G95-117 Control of a Flexible Space Robot Executing a Docking Maneuver. Y. Chen and L. Meirovitch, *Virginia Polytechnic Institute and State University* (**18**, 4, p. 756) Article

G95-118 Identification of Linear Stochastic Systems Through Projection Filters. Chung-Wen Chen, *Geophysical and Environmental Research Corporation*; Jen-Kuang Huang, *Old Dominion University*; and Jer-Nan Juang, *NASA Langley Research Center* (**18**, 4, p. 767) Article based on AIAA Paper 92-2520 CP922

G95-119 Decentralized Sliding Mode Control in Three-Axis Inertial Platforms. Yuri B. Shtessel, *University of Alabama in Huntsville* (**18**, 4, p. 773) Article

G95-120 Minimum-Time Reorientation of a Two-Degree-of-Freedom Gyroscope. Shmuel Boyarski and Joseph Z. Ben-Asher, *Tel-Aviv University, Israel* (**18**, 4, p. 782) Article

G95-121 Robust Game Theoretic Synthesis in the Presence of Uncertain Initial States. Sinpyo Hong and Jason L. Speyer, *University of California, Los Angeles* (**18**, 4, p. 792) Article

G95-122 Flutter Margin Augmentation Synthesis Using Normalized Coprime Factors Approach. Dario H. Baldelli and Hirobumi Ohta, *Nagoya University, Japan*; and Hiroshi Matsushita, Masataka Hashidate, and Kenichi Saitoh, *National Aerospace Laboratory, Japan* (**18**, 4, p. 802) Article

G95-123 Nonlinear Decoupling Control of Aircraft Motion. Zhou Zhiqiang, *Northwestern Polytechnical University, PRC* (**18**, 4, p. 812) Article based on AIAA Paper 94-3517 CP949

G95-124 Aircraft Terrain Following Based on a Nonlinear Continuous Predictive Control Approach. Ping Lu and Bion L. Pierson, *Iowa State University* (**18**, 4, p. 817) Article based on AIAA Paper 95-3342 CP957

G95-125 Close Conjunction Detection on Parallel Computer. Liam M. Healy, *U.S. Naval Research Laboratory* (**18**, 4, p. 824) Article

G95-126 Optimal Low-Thrust Three-Dimensional Earth–Moon Trajectories. Craig A. Kluever, *University of Missouri–Columbia/Kansas City*; and Bion L. Pierson, *Iowa State University* (**18**, 4, p. 830) Article

G95-127 Terminal Spacecraft Coplanar Rendezvous Control. Shaohua Yu, *Center for Space Science and Applied Research, PRC* (**18**, 4, p. 838) Article

G95-128 Satellite Autonomous Navigation Based on Magnetic Field Measurements. Gil Shorshi and Itzhack Y. Bar-Itzhack, *Technion—Israel Institute of Technology* (**18**, 4, p. 843) Article

G95-129 Estimation and Control of Tethered Satellite Systems. Ehud Netzer, *Technion—Israel Institute of Technology*; and Thomas R. Kane, *Stanford University* (**18**, 4, p. 851) Article

G95-130 Spacecraft Orientation Based on Space Object Observations by Means of Quaternion Algebra. L. Aramanovitch, *State University of Geodesy and Cartography, Russia* (**18**, 4, p. 859) Article

G95-131 Closed Loop Momentum Transfer Maneuvers Using Multiwheels. Jun'ichiro Kawoguchi, *Institute of Space and Astronautical Science, Japan*; Ken Maeda, *NEC Aerospace System, Ltd., Japan*; and Hiroki Matsuo and Keiken Ninomiya, *Institute of Space and Astronautical Science, Japan* (**18**, 4, p. 867) Article based on AIAA Paper 92-4332 CP928

G95-132 Dynamic Modeling of a Trailing Wire Towed by an Orbiting Aircraft. James M. Clifton, *U.S. Naval Air Warfare Center*; Louis V. Schmidt, *U.S. Naval Postgraduate School*; and Thomas D. Stuart, *U.S. Navy* (**18**, 4, p. 875) Article based on AIAA Paper 93-3663 CP937

G95-133 Geometric Stiffening in Multibody Dynamics Formulations. Inna Sharf, *University of Victoria, Canada* (**18**, 4, p. 882) Article

G95-134 Application of Rigid Finite Element Method to Dynamic Analysis of Spatial Systems. Edmund Wittbrodt and Stanislaw Wojciech, *Technical University of Gdansk, Poland* (**18**, 4, p. 891) Article

G95-135 Eigenvector Derivatives for Mechanical Second-Order Systems. Youdan Kim and Seungjae Lee, *Seoul National University, Korea*; and John L. Junkins, *Texas A&M University* (**18**, 4, p. 899) Article

G95-136 Maximum Power Absorption with Active Struts. Rakel Kristin Kanestrøm, *Stord/Haugesund College, Norway*; and Olav Egeland, *Norwegian Institute of Technology* (**18**, 4, p. 907) Engineering Note

G95-137 Two Misconceptions in the Theory of Inertial Navigation Systems. Itzhack Y. Bar-Itzhack, *Technion—Israel Institute of Technology* (**18**, 4, p. 908) Engineering Note based on AIAA Paper 93-3819 CP934

G95-138 Controllability and Optimization in Aeroassited Orbital Transfer. R. Andiarti and C. H. Moog, *Laboratoire d'Automatique de Nantes, France*; and J. Szymanowski, *Warsaw University of Technology, Poland* (**18**, 4, p. 911) Engineering Note

G95-139 Shaping Time Response by State Feedback in Minimum-Phase Systems. Pradeep Misra and Arnab K. Shaw, *Wright State University* (**18**, 4, p. 913) Engineering Note

G95-140 Experimental Control of a Single-Link Flexible Arm Incorporating Electrorheological Fluids. Seung-Bok Choi, *Inha University, Korea*; and Brian S. Thompson and Mukesh V. Gandhi, *Michigan State University* (**18**, 4, p. 916) Engineering Note

G95-141 Calculation of Second and Higher Order Eigenvector Derivatives. Michael I. Friswell, *University College of Swansea, Wales, UK* (**18**, 4, p. 919) Engineering Note

G95-142 *U*-Parameter Robust Flight Control Design. Chih-Min Lin, *Yuan-Ze Institute of Technology, Taiwan, ROC*; and Ruey-Shih Tai, *Chung-Shan Institute of Science and Technology, Taiwan, ROC* (**18**, 4, p. 921) Engineering Note

G95-143 Methodology for Integration of Digital Control Loaders in Aircraft Simulators. Amnon Katz and Marc F. Schamlé, *University of Alabama* (**18**, 4, p. 923) Engineering Note

G95-144 Improved Literal Approximation for Lateral-Directional Dynamics of Rigid Aircraft. Rafael Livneh, *Arizona State University* (**18**, 4, p. 925) Engineering Note

G95-145 Pointing Geometry for Low Earth Orbit Auroral Observations. F. Shahidi and L. J. C. Woolliscroft, *University of Sheffield, England, UK* (**18**, 4, p. 928) Engineering Note

G95-146 Low-Earth-Orbit Maintenance: Reboost vs Thrust–Drag Cancellation. I. Michael Ross and Kyle T. Alfriend, *U.S. Naval Postgraduate School* (**18**, 4, p. 930) Engineering Note

G95-147 Near-Optimal Three-Dimensional Rotational Maneuvers of Spacecraft Using Manipulator Arms. S. Krishnan and S. R. Vadali, *Texas A&M University* (**18**, 4, p. 932) Engineering Note

G95-148 Multistage Integration Model for Human Egomotion Perception. Greg L. Zacharias and Adam X. Miao, *Charles River Analytics*; and Rik Warren, *Armstrong Laboratory* (**18**, 5, p. 937) Article based on AIAA Paper 93-3564 CP937

G95-149 Feedback Linearization Autopilot Design for the Advanced Kinetic Energy Missile Boost Phase. H. J. Gratt, *KBM Enterprises, Inc.*; and W. L. McCowan, *U.S. Army Missile Command* (**18**, 5, p. 945) Article based on AIAA Paper 93-3736 CP934

G95-150 Bank-to-Turn Optimal Guidance with Linear Exponential Quadratic Gaussian Performance Criterion. Jium-Ming Lin, *Chung-Hua Polytechnic Institute, Taiwan, ROC*; and Shih-Wen Lee, *Chung Shan Institute of Science and Technology, Taiwan, ROC* (**18**, 5, p. 951) Article

G95-151 Optimal Guidance and Nonlinear Estimation for Interception of Accelerating Targets. Michael E. Hough, *Textron Defense Systems* (**18**, 5, p. 959) Article

G95-152 Proportional Navigation and Weaving Targets. Paul Zarchan, *Charles Stark Draper Laboratory, Inc.* (**18**, 5, p. 969) Article

G95-153 Linearized Kappa Guidance. Demetrios Serakos, *U.S. Naval Surface Warfare Center*; and Ching-Fang Lin, *American GNC Corporation* (**18**, 5, p. 975) Article

G95-154 Optimum Guidance with a Single Uncertain Time Lag. I. Yaesh and J. Z. Ben Asher, *TAAS Israel Industries* (**18**, 5, p. 981) Article

G95-155 Numerical Approach to Computing Nonlinear H_∞ Control Laws. Jie Huang and Ching-Fang Lin, *American GNC Corporation* (**18**, 5, p. 989) Article

G95-156 Optimal Pole Placement in Time-Dependent Linear Systems. William E. Wiesel, *U.S. Air Force Institute of Technology* (**18**, 5, p. 995) Article

G95-157 Closed-Form Solutions to Constrained Control Allocation Problem. Kenneth A. Bordignon and Wayne C. Durham, *Virginia Polytechnic Institute and State University* (**18**, 5, p. 1000) Article

G95-158 On-Line Learning Neural-Network Controllers for Autopilot Systems. Marcello R. Napolitano and Michael Kincheloe, *West Virginia University* (**18**, 5, p. 1008) Article

G95-159 Reconfigurable Tracking Control with Saturation. M. Pachter, *U.S. Air Force Institute of Technology*; and P. R. Chandler and M. Mears, *U.S. Air Force Wright Laboratory* (**18**, 5, p. 1016) Article

G95-160 Nonlinear Predictive Control of Feedback Linearizable Systems and Flight Control System Design. Sahjendra N. Singh, *University of Nevada, Las Vegas*; and Marc Steinberg and Robert D. DiGirolamo, *U.S. Naval Air Warfare Center* (**18**, 5, p. 1023) Article

G95-161 Feedback System Design for Stable Plants with Input Saturation. R. A. Hess, *University of California, Davis* (**18**, 5, p. 1029) Article

G95-162 Finite Element Method for the Solution of State-Constrained Optimal Control Problems. Robert R. Bless, *Lockheed Engineering and Sciences Company, Inc.*; Dewey H. Hodges, *Georgia Institute of Technology*; and Hans Seywald, *Analytical Mechanics Associates, Inc.* (**18**, 5, p. 1036) Article

G95-163 Dissipative Controllers for Nonlinear Multibody Flexible Space Systems. A. G. Kelkar and S. M. Joshi, *NASA Langley Research Center*; and T. E. Alberts, *Old Dominion University* (**18**, 5, p. 1044) Article

G95-164 Substructure-Based Controller Design Method for Flexible Structures. Tzu-Jeng Su, *NASA Langley Research Center*; and Vit Babuška and Roy R. Craig Jr., *University of Texas at Austin* (**18**, 5, p. 1053) Article

G95-165 Flexible Vehicle Control Using Quantitative Feedback Theory. R. A. Hess and D. K. Henderson, *University of California, Davis* (**18**, 5, p. 1062) Article

G95-166 Precision Position Control of Piezoelectric Actuators Using Charge Feedback. John A. Main, *University of Maine*; Ephrahim Garcia, *Vanderbilt University*; and David V. Newton, *Garman Systems, Inc.* (**18**, 5, p. 1068) Article

G95-167 Unified Literal Approximations for Longitudinal Dynamics of Flexible Flight Vehicles. Rafael Livneh, *Arizona State University*; and David K. Schmidt, *University of Maryland* (**18**, 5, p. 1074) Article

G95-168 Aircraft Flight Control in Wind Shear Using Sequential Dynamic Inversion. Sandeep S. Mulgund and Robert F. Stengel, *Princeton University* (**18**, 5, p. 1084) Article

G95-169 Control Stick Logic in High-Angle-of-Attack Maneuvering. Wayne C. Durham, *Virginia Polytechnic Institute and State University* (**18**, 5, p. 1092) Article

G95-170 Hybrid Fuzzy Logic Flight Controller Synthesis via Pilot Modeling. K. KrishnaKumar, *University of Alabama*; P. Gonsalves, *Charles River Analytics*; A. Satyadas, *Flexible Intelligence Group, LLC*; and G. Zacharias, *Charles River Analytics* (**18**, 5, p. 1098) Article

G95-171 Time-Optimal Lateral Maneuvers of an Aircraft. Yigang Fan, Frederick H. Lutze, and Eugene M. Cliff, *Virginia Polytechnic Institute and State University* (**18**, 5, p. 1106) Article

G95-172 Aircraft Antilock Brake System with Neural Networks and Fuzzy Logic. H. Chris Tseng, *Duke University*; and Charlie W. Chi, *Santa Clara University* (**18**, 5, p. 1113) Article

G95-173 Stability of Motion on Three-Dimensional Halo Orbits. Mihai Popescu, *Institute of Applied Mathematics, Romania* (**18**, 5, p. 1119) Article

G95-174 Experimental Satellite Trajectory Analysis Using Decision-Based Robust Design. Uwe Lautenschlager, Stein Ove Erikstad, Janet K. Allen, and Farrokh Mistree, *University of Houston* (**18**, 5, p. 1126) Article

G95-175 Earth-to-Moon Transfer with a Limited Power Engine. Moshe Guelman, *Technion—Israel Institute of Technology* (**18**, 5, p. 1133) Article based on AIAA Paper 94-3761 CP9411

G95-176 Expert System for Processing Uncorrelated Satellite Tracks. Michael Hecker, *U.S. Naval Postgraduate School* (**18**, 5, p. 1139) Article

G95-177 Optimal Power-Limited Rendezvous with Thrust Saturation. Cyrus J. Pardis, *Worcester Polytechnic Institute*; and

Thomas E. Carter, *Eastern Connecticut State University* (**18**, 5, p. 1145) Article

G95-178 Optimal Station-Change Maneuver for Geostationary Satellites Using Constant Low Thrust. Nathan A. Titus, *Phillips Laboratory* (**18**, 5, p. 1151) Article

G95-179 Fuel-Optimal Stationkeeping via Differential Inclusions. Renjith R. Kumar and Hans Seywald, *Analytical Mechanics Associates, Inc.* (**18**, 5, p. 1156) Article

G95-180 Integrating Robustness into Multiobjective Space Vehicle Design Process. Stein Ove Erikstad, Uwe Lautenschlager, Bert Bras, Janet K. Allen, and Farrokh Mistree, *Georgia Institute of Technology* (**18**, 5, p. 1163) Article

G95-181 Modeling Issues Related to Retrieval of Flexible Tethered Satellite Systems. Euisok Kim and Srinivas R. Vadali, *Texas A&M University* (**18**, 5, p. 1169) Article

G95-182 Spinup Dynamics of Gyrostats. Christopher D. Hall, *U.S. Air Force Institute of Technology* (**18**, 5, p. 1177) Article

G95-183 Near-Minimum-Time Eigenaxis Rotation Maneuvers Using Reaction Wheels. Willem H. Steyn, *University of Stellenbosch, South Africa* (**18**, 5, p. 1184) Article

G95-184 Fluid Force Activated Spacecraft Dynamics Driven by Gravity Gradient and Jitter Accelerations. R. J. Hung and H. L. Pan, *University of Alabama in Huntsville* (**18**, 5, p. 1190) Article

G95-185 Nutational Stability and Passive Control of Spinning Rockets with Internal Mass Motion. D. M. Halsmer, *Oral Roberts University*; and D. L. Mingori, *University of California, Los Angeles* (**18**, 5, p. 1197) Article based on AIAA Paper 92-4544 CP928

G95-186 Distributed Control of Maneuvering Vehicles for On-Orbit Assembly. Colin R. McInnes, *University of Glasgow, Scotland, UK* (**18**, 5, p. 1204) Engineering Note

G95-187 Optimal Direct Ascent with Carrier Return to Base. G. Sachs and R. Bayer, *Technical University of Munich, Germany* (**18**, 5, p. 1206) Engineering Note

G95-188 Control Variables for Finite Element Solution of Missile Trajectory Optimization. Dewey H. Hodges, *Georgia Institute of Technology*; and Malvin G. Johnson Jr., *LORAL Vought Systems* (**18**, 5, p. 1208) Engineering Note

G95-189 Minimal Time Change Detection Algorithm for Reconfigurable Flight Control Systems. Sungwan Kim, *University of California, Los Angeles* (**18**, 5, p. 1211) Engineering Note

G95-190 Elliptical Orbit with Variable Angular Momentum. Rachad M. Shoucri, *Royal Military College of Canada* (**18**, 5, p. 1213) Engineering Note

G95-191 Autonomous Ring Formation for a Planar Constellation of Satellites. Colin R. McInnes, *University of Glasgow, Scotland, UK* (**18**, 5, p. 1215) Engineering Note

G95-192 Orbital Strategies Around a Comet by Means of a Genetic Algorithm. Maxwell Noton, *England, UK* (**18**, 5, p. 1217) Engineering Note

G95-193 Clarification of the Garber Instability for Gravity-Gradient Stabilized Spacecraft. John T. Harduvel, *McDonnell Douglas Aerospace* (**18**, 5, p. 1220) Engineering Note

G95-194 Fuel/Time Optimal Control of the Benchmark Problem. Tarunraj Singh, *State University of New York at Buffalo* (**18**, 6, p. 1225) Article

G95-195 Nonlinear Control Law for Aerial Towed Target. Alexander S. Bourmistrov, Robin D. Hill, and Paul Riseborough, *Royal Melbourne Institute of Technology, Australia* (**18**, 6, p. 1232) Article

G95-196 Optimal Tradeoff Between H_2 Performance and Tracking Accuracy in Servocompensator Synthesis. Andrew G. Sparks and Dennis S. Bernstein, *University of Michigan* (**18**, 6, p. 1239) Article

G95-197 Real Structured Singular Value Synthesis Using the Scaled Popov Criterion. Andrew G. Sparks and Dennis S. Bernstein, *University of Michigan* (**18**, 6, p. 1244) Article

G95-198 Pole Placement in Optimal Regulator by Continuous Pole-Shifting. Y. Ochi and K. Kanai, *National Defense Academy, Japan* (**18**, 6, p. 1253) Article based on AIAA Paper 93-3845 CP934

G95-199 Maximum-Payload Trajectories for a Laser-Propelled Launch Vehicle. W. Edward Humble and Bion L. Pierson, *Iowa State University* (**18**, 6, p. 1259) Article

G95-200 Adjoint Variable Solutions via an Auxiliary Optimization Problem. Craig A. Martell and John A. Lawton, *U.S. Naval Surface Warfare Center* (**18**, 6, p. 1267) Article

G95-201 Optimal Planar Interception with Terminal Constraints. Moshe Idan, *Technion—Israel Institute of Technology*; Oded M. Golan, *RAFAEL, Ministry of Defense, Israel*; and Moshe Guelman, *Technion—Israel Institute of Technology* (**18**, 6, p. 1273) Article

G95-202 Neural-Network-Based Scheme for Sensor Failure Detection, Identification, and Accommodation. Marcello R. Napolitano, Charles Neppach, Van Casdorph, and Steve Naylor, *West Virginia University*; and Mario Innocenti and Giovanni Silvestri, *University of Pisa, Italy* (**18**, 6, p. 1280) Article

G95-203 Analytical Models of Doppler Data Signatures. Connie J. Weeks and Melissa J. Bowers, *Loyola Marymount University* (**18**, 6, p. 1287) Article

G95-204 Identification of a Nonlinear Aerodynamic Model of the F-14 Aircraft. Thomas L. Trankle, *Systems Control Technology, Inc.*; and Stephen D. Bachner, *U.S. Naval Air Warfare Center* (**18**, 6, p. 1292) Article based on AIAA Paper 93-3634 CP937

G95-205 Resonance Control of Aircraft Instabilities by Smooth and Continuous Feedback. Mark A. Pinsky and Bill Essary, *University of Nevada, Reno* (**18**, 6, p. 1298) Article

G95-206 Aerocapture with a Flexible Tether. Jordi Puig-Suari, James M. Longuski, and Steven G. Tragesser, *Purdue University* (**18**, 6, p. 1305) Article

G95-207 Comparative Stability Analysis and Performance of Magnetic Controllers for Bias Momentum Satellites. Hari B. Hablani, *Rockwell International Corporation* (**18**, 6, p. 1313) Article

G95-208 Magnetic Precession and Product-of-Inertia Nutation Damping of Bias Momentum Satellites. Hari B. Hablani, *Rockwell International Corporation* (**18**, 6, p. 1321) Article

G95-209 Resonance Capture in Unbalanced Dual-Spin Spacecraft. Raymond Tsui and Christopher D. Hall, *U.S. Air Force Institute of Technology* (**18**, 6, p. 1329) Article based on AIAA Paper 94-3714 CP9411

G95-210 Robust Closed-Loop Control Design for Spacecraft Slew Maneuver Using Thrusters. Brij N. Agrawal and Hyochoong Bang, *U.S. Naval Postgraduate School* (**18**, 6, p. 1336) Article

G95-211 Smooth Sliding-Mode Control for Spacecraft Attitude Tracking Maneuvers. Shih-Che Lo and Yon-Ping Chen, *National Chiao Tung University, Taiwan, ROC* (**18**, 6, p. 1345) Article

G95-212 Suboptimal Command Generation for Control Moment Gyroscopes and Feedback Control of Spacecraft. S. R. Vadali and S. Krishnan, *Texas A&M University* (**18**, 6, p. 1350) Article

G95-213 Roll/Pitch Determination with Scanning Horizon Sensors: Oblateness and Altitude Corrections. Hari B. Hablani, *Rockwell International Corporation* (**18**, 6, p. 1355) Article

G95-214 Spacecraft Attitude Determination by Kalman Filtering of Global Positioning System Signals. Stephen J. Fujikawa, *Welch Engineering, Ltd.*; and Darrell F. Zimbelman, *ITHACO Technical Services* (**18**, 6, p. 1365) Article

G95-215 Feedback Control Logic for Spacecraft Eigenaxis Rotations Under Slew Rate and Control Constraints. Bong Wie and Jianbo Lu, *Arizona State University* (**18**, 6, p. 1372) Article based on AIAA Paper 94-3563 CP948

G95-216 Near-Minimum-Time Maneuvers of Large Structures: Theory and Experiments. S. R. Vadali, M. T. Carter, and T. Singh, *Texas A&M University*; and N. S. Abhyankar, *Dynacs Engineering Company* (**18**, 6, p. 1380) Article based on AIAA Paper 94-3624 CP948

G95-217 Experiments with Model-Simplified Computed-Torque Manipulator Controllers for Free-Flying Robots. R. Koningstein, *CriSys, Ltd., Canada*; and R. H. Cannon Jr., *Stanford University* (**18**, 6, p. 1386) Article

G95-218 Modeling of Translational Motion Between Two Flexible Bodies Connected via Three Points. Sivakumar S. K. Tadikonda, *Grumman Corporation* (**18**, 6, p. 1392) Article

G95-219 Influence of Pinned Joints on Damping and Dynamic Behavior of a Truss. Steven L. Folkman, Edwin A. Rowsell, and Greg D. Ferney, *Utah State University* (**18**, 6, p. 1398) Article

G95-220 Motion of a Rigid Body with an Attached Spring-Mass Damper. Anne E. Chinnery and Christopher D. Hall, *U.S. Air Force Institute of Technology* (**18**, 6, p. 1404) Article based on AIAA Paper 94-3715 CP9411

G95-221 Generalization of the Wittrick–Williams Formula for Counting Modes of Flexible Structures. A. V. Balakrishnan, *University of California, Los Angeles* (**18**, 6, p. 1410) Article

G95-222 Observability of Gravimeter-Aided Inertial Navigation Systems. Y. G. Prokhorov, *State Academy of Management, Russia* (**18**, 6, p. 1416) Article

G95-223 Simple Guidance Method for Single Stage to Low Earth Orbit. Bandu N. Pamadi, *ViGYAN, Inc.* (**18**, 6, p. 1420) Article

G95-224 Terminal Homing Performance of Semiactive Missiles Against Multitarget Raids. Craig Phillips, *U.S. Naval Surface Warfare Center* (**18**, 6, p. 1427) Article

G95-225 Bayesian State Estimation for Tracking and Guidance Using the Bootstrap Filter. Neil Gordon and David Salmond, *Defence Research Agency, England, UK*; and Craig Ewing, *Eglin Air Force Base* (**18**, 6, p. 1434) Article based on AIAA Paper 93-3701 CP934

G95-226 Terrain-Aided Navigation Using the Viterbi Algorithm. Russell Enns, *McDonnell Douglas Helicopter Company*, and Darryl Morrell, *Arizona State University* (**18**, 6, p. 1444) Article

G95-227 Passive Airborne Navigation and Terrain Avoidance Using Gravity Gradiometry. David M. Gleason, *Phillips Laboratory* (**18**, 6, p. 1450) Article

G95-228 Optimal Maneuver of a Flexible Arm by Space–Time Finite Element Method. Alona Ben-Tal and Pinhas Bar-Yoseph, *Technion—Israel Institute of Technology*, and Henryk Flashner, *University of Southern California* (**18**, 6, p. 1459) Engineering Note

G95-229 Determination of Weighting Matrices of a Linear Quadratic Regulator. Jia Luo, *Lutz, Daily and Brain*; and C. Edward Lan, *University of Kansas* (**18**, 6, p. 1462) Engineering Note

G95-230 Recurrent Artificial Neural Network Simulation of a Chaotic System Without Training. Andrew J. Meade Jr. and Rafael Moreno, *William Marsh Rice University* (**18**, 6, p. 1463) Engineering Note
